Source: Centers for Disease Control and Prevention (CDC) National Healthcare Safety Network (NHSN), 4/18/2016

- As measured by Standardized Infection Ratio (SIR)
  - SIRs = Number of Observed Infections/Number of Predicted Infections.
  - Facilities where the SIR is not statistically different than one are categorized as "No Different Than The National Benchmark."
  - Facilities where the SIR is statistically higher than one are categorized as "Worse Than The National Benchmark".
  - Facilities where the SIR is statistically lower than one are categorized as "Better Than The National Benchmark."
  - \*Facilities with device days but no SIR are classified as “Too Small to Calculate."
  - \*\*Facilities with no device days, at least two quarters with no device days in 2015 or with at least one quarter with no device days in 2015 are classified as

Revised 1 Jun 2016

You are encouraged to talk with your care team and ask for central lines to be removed as soon as they are no longer required.
